## Evening Brief

Date: Monday October 5<sup>th</sup>, 2020

### Weather Summary

#### \*\*\* Strong Winds by end of the week for Western NV \*\*\*

Well above normal temperatures and dry weather will continue through much of this week, as an unusually strong high-pressure ridge along the West Coast continues to dominate across the entire western US.

Afternoon temperatures will be 8-12 degrees above normal, along with afternoon humidity levels ranging from 6-12% across the southern half of the Great Basin, and 13-20% across most northern areas, along with moderate to poor humidity recovery across most mid-upper slopes.

Haze/smoke will continue to impact the southern half of the Great Basin occasionally from fires in California.

Later this week, southwest winds will begin to increase across the western portion of the Great Basin, as a deepening storm system is expected to approach the West Coast. **High Risk has been issued** (see map/matrix).

By next weekend, there is the potential for widespread precipitation across western and northern areas of the Great Basin.

---

### Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	PL 3	Light Initial Attack Activity
National	PL 4	New Fires and Acres: 8 fires for 25.7 acres / 6,928 acres Large Fire Growth

---

### Fuels/Fire Potential

#### \*\* Fuel and Fire Behavior Advisory in Effect for Parts of ID, Eastern & Southern NV into UT \*\*\*

The continuation of above normal temperatures and very dry conditions will bring about more drying of fuels across all areas of the Great Basin, including Idaho and Wyoming. Fuels in the southern half of the Great Basin are still near record level dryness. Fuels in northern areas will likely approach critical levels again by early this coming week.

Live Fuel moisture in low elevation brush remains critically dry, between 60-100% in most areas, which correlates with extreme fire behavior.

By this coming weekend, a large, long duration precipitation event across northern and central area should bring significant and long-lasting moistening of fuels to those area.

## Resources:

### Aviation within the Great Basin

- 1 VLAT, 3 LATs, 2 CL-415
- 16 SEATs, 0 FB, 8 AA, 0 ASM, 0 LP
- 8 Type 1 Helicopters / 8 Comm.
- 6 Type 2 Helicopters / 6 Comm.
- 17 Type 3 Helicopters / 16 Comm.

### Crews Committed within the Great Basin

- 4 IHCs / 0 Available
- 10 Type 2IA / 0 Available

## Current Incident Details
